Project Title	AI Enabled Candidate Resume Screening
Maximum Marks	10 Marks

Model Optimization and Tuning Phase

The Model Optimization and Tuning Phase involves refining neural network models for peak performance. It includes optimized model code, fine-tuning hyperparameters, comparing performance metrics, and justifying the final model selection for enhanced predictive accuracy and efficiency.

Hyperparameter Tuning Documentation (8 Marks):

Model	Tuned Hyperparameters
Model 1	-

Final Model Selection Justification (2 Marks):

Final Model	Reasoning
-------------	-----------

Model 1	Early stopping is frequently used in neural networks to ensure that the model doesn't overfit when learning from diverse and sometimes noisy resume data.
---------	---
