Project Title	Amazon Kindle Store Reviews Analysis
Maximum Marks	5 Marks

Feature Selection Report Template

In this analysis, each feature from the Amazon Kindle Store review dataset is listed with a description. For each, a decision is made on whether to include it, with justification provided to ensure clarity and transparency in feature selection.

Feature	Description	Selected (Yes/No)	Reasoning
Reviewe	A unique identifier for each review	Yes	Helps in indexing and identifying individual reviews uniquely.
Review ID	A unique ID for the user posting the review	Yes	Useful for tracking reviews from the same user and understanding reviewer behavior.
Review Text	The actual review content provided by the user	Yes	Central to sentiment analysis and opinion mining tasks.
Review Rating	Star rating (1 to 5) provided by the reviewer	Yes	Serves as the target or dependent variable for sentiment classification.

Review Date	Date when the review was posted	Yes	Useful for temporal analysis and trends over time.
Verified Purchase	Indicates whether the purchase was verified by Amazon	Yes	Adds credibility to the review; important for filtering trustworthy reviews.
Product Title	Title of the Kindle eBook	No	Redundant if analysis is focused on general sentiment across products. Can be added in a product-specific analysis.
Product Category	The genre or type of book (e.g., Romance, Sci-fi)	Yes	Helps in analyzing sentiment trends across different genres.
Helpfulness Score	Number of users who found the review helpful	Yes	Useful for weighting the reviews during analysis.
Review Length	Number of words/characters in the review	Yes	Helps in understanding verbosity and its impact on review sentiment.
